

KAPITAN
ENGINEERING, INC.

Cable Networks/Land Surveying

Civil Engineering/Telecommunications Technician

Entry-level full time position for a recent or upcoming graduate with a 2-year technical degree in civil engineering technology or similar program. Applicants should have basic knowledge of road and utility construction methods, possess good skills with interpreting road plans, survey plats, and utility construction drawings.

Applicants must be proficient in AutoCAD computer drafting and Microsoft Word/Excel. Civil 3D experience is a plus. Responsibilities will include CAD drafting, field staking, construction inspection, and acceptance testing for fiber optic projects in southern and central Wisconsin. Will also assist our surveying department with various projects. Located near Madison, Kapitan Engineering is a utility design and construction surveying firm that offers competitive wages and benefits. If you possess the above qualifications, have good written and verbal skills, can work well with others or independently, and have reliable transportation, please forward or email your resume with references to:
